A new extended release injectable dewormer, LongRange® was launched in Canada in 2016.

In an effort to determine the benefit of LongRange® under Canadian conditions, a study was done during the grazing season of 2016. Dr. Calvin Booker walks us through the findings from this study, exploring the differences between the treated and control groups.

Dr. Booker is an Affiliate Faculty Member in the Department of Clinical Sciences at Colorado State University and the AABP 2006 Merial Preventative Medicine Beef Award Recipient.
