# LASER THERAPY FOR COMPANION ANIMALS IN BANFF, ALBERTA

Saturday, October 14, 2017

## DESCRIPTION OF SEMINAR

Class 3b laser technology, which has been around since the 1960's, is the most thoroughly researched class of laser therapy in the world. It has only been over the last few years that the laser therapy market is inundated with information – a lot of which is very misleading to the learning practitioner. The core objective of this educational event is to pull back the curtain to reveal the truth behind these claims. With a look at the science behind low-level laser therapy, the key differences between Class 3b and Class 4 laser technology, and the “power” argument – how much is necessary for optimal results – we will demonstrate how laser therapy can decrease pain, reduce inflammation, and accelerate the healing process in companion animals

## KEY LEARNING OBJECTIVES

- Learn the science behind low-level laser therapy (LLLT) and its effects on soft tissue and nerve healing
- Understand the key differences between Class 3b and Class 4 laser technology
- Understand the “power” argument – how much is necessary for optimal results
- Learn how laser therapy increases treatment efficacy for companion animals

**VENUE**  
**Fairmont Banff Springs Hotel**  
 405 Spray Ave, Banff, AB T1L 1J4  
 Norquay Meeting Room
