

Anesthesia

WEDNESDAY MAY 12, 2021

Overcoming the challenges in everyday small animal anesthesia practice!

Speakers:

Daniel Pang, BVSc PhD DACVAA DECVAA MRCVS
EBVS European Specialist in Veterinary Anaesthesia &
Analgesia Assoc Professor Veterinary Clinical &
Diagnostic Sciences UCVM

Jessica Pang, BSc(Hons) DVM MVetSc Clinical
Instructor, Veterinary Anesthesia UCVM

The complexity and demands of anesthetic management in practice is steadily increasing and it can be challenging to keep pace. New anesthetic drugs, equipment and techniques are emerging at a rapid rate and advances in dentistry and other interventional therapies result in longer anesthetics being performed on sicker patients. This session aims to clarify and enhance understanding of how to optimize anesthetic management by tackling common myths and misconceptions surrounding topics such as: drug selection & administration, fluids, monitoring targets, post-operative analgesia, and equipment problems.
