Biopsies are one of the most useful tools available for dermatological cases. They stand as a cornerstone in diagnosing skin conditions, offering invaluable insight. During this webcast, **Dr. Elizabeth Goodale** will explore ways to harness their full potential, as careful consideration is paramount when deciding the timing and location of biopsy procedures.

Join us as we review proper techniques to provide pathologists with comprehensive data for accurate analysis.

Elizabeth Goodale
DVM, Dipl. ACVD

Dr. Elizabeth Goodale received her veterinary degree from the University of Guelph and completed her dermatology residency at the University of California, Davis. After passing her dermatology boards in 2016, she worked as a clinical dermatologist at the UC Davis Veterinary Medical Teaching Hospital for two years, before returning to Canada. She currently practises in Morriston, Ontario. She is also the chair of the credentials committee for the American College of Veterinary Dermatologists (ACVD) and the editor-in-chief of the bulletin for the Canadian Academy of Veterinary Dermatology (CAVD).
