Virbac

## TOPIC:

**Mechanisms of otitis externa and the role of inflammation –  
Presentation of a new topical diester corticosteroid ear treatment and its efficacy  
in the management of erythemato-ceruminous otitis externa**

## PRESENTER: Dr. Sébastien Viaud, DVM, Dip ECVD

Sébastien Viaud received his Doctor of Veterinary Medicine degree in 2008 from the Alfort National Veterinary School. After a 3-year residency, Sébastien became a diplomate of the European College of Veterinary Dermatology (Dip ECVD, EBVS European Specialist in Veterinary Dermatology) in 2013. Since 2014, he runs the Dermatology Unit of the Anicura Aquivet Veterinary Hospital in Eysines, in the suburbs of Bordeaux in France. Sébastien is a member of numerous organizations: the European Society of Veterinary Dermatology (ESVD), the European College of Veterinary Dermatology (ECVD), and the French Dermatology Study Group for Small Animals. Sébastien has been a board member for the French Dermatology Study Group for Small Animals since 2021 and is an active member of its Scientific Council. Sébastien was a member of the Examination Committee of the European College of Veterinary Dermatology (ECVD) from 2017 to 2023. He has been published over 20 times and is the co-author of Dermatology of Exotic Pets. His areas of expertise are otology, and particularly the study of the tympanic membrane, lasers, and onco-dermatology.

60 min. presentation  
30 min. Q&A

### MODERATOR:

Dr. Natasha Smith

## REGISTER NOW:

Registration grants access to a video recording of the webinar for 7 days after

## PRESENTATION INFORMATION:

Virbac Canada is excited to be launching CORTOTIC™ Hydrocortisone Aceponate Otic Spray in June 2024.

This webinar will cover:

- Definition of otitis externa
- Reminders on the structure and functions of the dog's external ear
- Focus on the microbiota of a healthy dog ear
- Variations in the physiological parameters of the external ear canal in cases of otitis externa in dogs
- Otitis externa at the center of primary, secondary, predisposing and perpetuating factors
- Reminders of the different primary, secondary, predisposing and perpetuating factors
- Focus on ways to avoid the appearance and perpetuation of inflammation of the ear canal
- Consequences of topical ear treatments on the microbiota of the external ear canal
- Presentation of the new topical ear corticosteroid treatment and the studies which allowed its legal authorization on the veterinary market
- Presentation of concrete clinical cases using this new ear topical treatment

\*Attendees (who participate live for one hour) will receive an email communication to document the CE credit for all associations that grant approval (7-14 business days after the event). This presentation is a live event but will be recorded and made available to registrants for a limited time. This webinar is RACE approved.
