Feline leukemia (FeLV) is an important cause of illness and death in cats worldwide. While veterinarians have made much progress in reducing FeLV infections and illness in many parts of Canada, there is still much work to be done. During this webcast, **Dr. Susan Little** will present up-to-date information on the prevalence and the importance of prevention with vaccination, especially for kittens. She will also share new insight into the behaviour of FeLV infection and how this influences testing.

Join us as we discuss the latest findings and strategies to help protect our feline patients from this significant threat to their health

Susan Little
DVM, Dipl. ABVP

Dr. Susan Little received her Bachelor of Science degree from Dalhousie University (Nova Scotia, Canada) and her DVM from the Ontario Veterinary College, University of Guelph. She has been in feline practice since 1990 and board certified in feline practice since 1997. She is part owner of two feline specialty practices in Ottawa, Canada. She has served on the board of the International Council for Veterinary Assessments, the American Association of Feline Practitioners, and the Winn Feline Foundation. She is a peer reviewer for veterinary journals as well as the author or co-author of many journal articles. Dr. Little is the recipient of the Canadian Veterinary Medical Association Small Animal Practitioner Award (2010), the NAVC Small Animal Speaker of the Year Award (2013), and the International Society of Feline Medicine/Hill's Pet Nutrition Award for outstanding contributions to feline medicine (2013). She is the editor and co-author of The Cat – Clinical Medicine and Management (1st edition 2015, 2nd edition coming in 2024) and August's Consultations in Feline Internal Medicine, Volume 7 (Elsevier, 2015).
