

# INVITATION TO A LIVE WEBCAST

## Clearing the path to elevated liver enzyme support in canines

December 6, 2023,  
at 7 p.m. (EST)

4:00 BC (PST) 5:00 AB (MST) 6:00 SK/MB (CST) 7:00 ON/QC (EST) 8:00 PEI/NB/NS (AST) 8:30 NL (NST)

Elevated liver enzymes can be indicative of hepatic disease, inflammation, or other underlying health issues. However, reaching a definitive diagnosis can be a challenge. There are often specific dosing regimens for liver support supplements to ensure their effectiveness. Supplements that require fasting or fat sources to improve absorption are limiting factors that may reduce compliance.

During this webcast, **Dr. Nicole Sheehan** will simplify the complex organ that is the liver and provide solutions that support liver wellness without the need to fast, which can improve owner compliance and clinical outcomes. She will review the research of clinically proven active ingredients that play a critical role in reducing elevated liver enzymes and how these ingredients can simplify the management of canine liver problems for pet owners and your practice.

Join us as we demystify the pathway to liver detoxification.

**Nicole Sheehan**  
DVM, CVA, CVCH, CVFT, MATP

Dr. Nicole Sheehan is a veterinarian and herbalist for animals. She owns four integrative veterinary hospitals in North Carolina and trains the 15 veterinarians in her practices to integrate wholefood nutrition and herbal remedies into their treatment protocols. She is passionate about feeding healthy nutrients, using care with chemicals, and keeping the liver healthy as a path to longevity and cancer-free quality of life for pets. She sees mostly second opinions part-time in her Davidson office, leads the other veterinary hospitals, and teaches classes on integrative and herbal medicine.
